Investment approach

- The Fund seeks to track the performance of the Index.
- In seeking to achieve its investment objective, the Fund aims to provide a return (comprising both income and capital appreciation) which, before application of fees and expenses, is similar to the return of the Index.
- The Fund employs a “passive management” – or indexing – investment approach, through physical acquisition of securities, designed to track the performance of the Index.
- In tracking the performance of the Index, the Fund will invest in a portfolio of fixed-rate bonds issued and/or guaranteed by the governments of euro zone member countries that so far as possible and practicable consist of a representative sample of the component securities of the Index.

About the benchmark

- The Index is a widely recognised benchmark designed to reflect the total universe of publicly traded, fixed-coupon, euro-denominated treasury securities with maturities greater than one year and which have a minimum issue size of EUR 300 million.

Performance summary as at 31 March 2018 *

EUR—Vanguard EUR Eurozone Government Bond UCITS ETF

	Net of expenses	Benchmark
March 2013 – 2014	—%	—%
March 2014 – 2015	—	—
March 2015 – 2016	—	—
March 2016 – 2017	-1.79	-1.68
March 2017 – 2018	3.08	3.15

Performance *

EUR—Vanguard EUR Eurozone Government Bond UCITS ETF

Benchmark—Bloomberg Barclays Euro Aggregate: Treasury Index

	Net of expenses	Gross of expenses	Benchmark
1 month	1.59%	1.60%	1.60%
3 months	1.41	1.44	1.43
Year to date	1.41	1.44	1.43
1 year	3.08	3.21	3.15
Since inception	1.00	1.12	1.10

* Figures for periods less than one year are cumulative returns. All other figures represent annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. The performance data does not take account of the commissions and costs incurred in the issue and redemption of shares. Basis of fund performance NAV to NAV with gross income invested. Basis of index performance is total return.

Past performance is not a reliable indicator of future results.

** Synthetic Risk and Reward Indicator

*** The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds. When you invest with any fund manager, you pay a number of charges, starting with the Annual Management Charge (AMC) which covers the fund manager’s costs of managing the fund. The AMC plus ongoing running costs and other operational expenses make up the fund’s total ‘ongoing charges figure’.

Key investment risks

The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events. Movements in currency exchange rates can adversely affect the return of your investment.

Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

Bond risk. The Fund invests in bonds which may provide higher yields but as such may carry greater credit risk increasing the risk of defaults on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds.

Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.

Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Please also read the risk factors section in the prospectus and the Key Investor Information Document, both of which are available on the Vanguard Website.

An exchange-traded fund

Investment Risk Information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Funds investing in fixed interest securities carry the risk of default on repayment and erosion of the capital value of your investment and the level of income may fluctuate. Movements in interest rates are likely to affect the capital value of fixed interest securities. Corporate bonds may provide higher yields but as such may carry greater credit risk increasing the risk of default on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds.

ETF shares can be bought or sold only through a broker. Investing in ETFs entails stockbroker commission and a bid- offer spread which should be considered fully before investing.

The fund(s) may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the fund's Net Asset Value. Some derivatives give rise to increased potential for loss where the fund's counterparty defaults in meeting its payment obligations.

Some funds invest in securities which are denominated in different currencies. Movements in currency exchange rates can affect the return of investments.

Glossary for ETF attributes

The ETF attributes section on the first page contains a number of metrics that professional investors use to value individual securities against a market or index average. These metrics can also be used to value and compare funds to the market by taking the average of all the securities held in the fund and comparing them to those of the fund's benchmark index. We've provided a definition of the terms used for your convenience.

Average coupon is the average interest rate paid on the fixed income securities held by a fund. It is expressed as a percentage of face value.

Average maturity is the average length of time until fixed income securities held by a fund reach maturity and are repaid, taking into consideration the possibility that the issuer may call the bond before its maturity date. The figure reflects the proportion of fund assets represented by each security; it also reflects any futures contracts held. In general, the longer the average effective maturity, the more a fund's share price will fluctuate in response to changes in market interest rates.

Average quality is an indicator of credit risk. This figure is the average of the ratings assigned to a fund's fixed income holdings by credit-rating agencies. The agencies make their judgment after appraising an issuer's ability to meet its obligations. Quality is graded on a scale, with Aaa or AAA indicating the most creditworthy bond issuers.

Average duration is an estimate of how much the value of the bonds held by a fund will fluctuate in response to a change in interest rates. To see how the value could change, multiply the average duration by the change in rates. If interest rates rise by 1 percentage point, the value of the bonds in a fund with an average duration of five years would decline by about 5%. If rates decrease by a percentage point, the value would rise by 5%.

Effective YTM (yield to maturity) is the rate of return an investor would receive if the fixed income securities held by a fund were held to their maturity dates.

Important information

The information contained in this document is not to be regarded as an offer to buy or sell or the solicitation of any offer to buy or sell securities in any jurisdiction where such an offer or solicitation is against the law, or to anyone to whom it is unlawful to make such an offer or solicitation, or if the person making the offer or solicitation is not qualified to do so. The information in this document is general in nature and does not constitute legal, tax, or investment advice. Potential investors are urged to consult their professional advisers on the implications of making an investment in, holding or disposing of shares of, and the receipt of distribution from any investment.
